SUMMARY

Detail-oriented Information Systems Penultimate student leveraging strong communication skills to deliver data-driven analytics and artificial intelligence solutions. Available for **Summer 2027 internships (May–August)**.

EDUCATION

Singapore Management University (SMU)

Sept 2024 – May 2028 (Expected)

Bachelor of Science (Information Systems) (Specialization in Business Analytics & 2nd Major in Computing Studies (AI))

Nanyang Polytechnic (NYP)

Apr 2021 – May 2024

Diploma in Applied AI & Analytics (Specialization in Big Data Analytics)

WORK EXPERIENCE

SMU SCIS | Research Assistant

Feb 2026 – May 2026

- Engineered a multi-modal AI pipeline (LlamaParse, Gemma 4 & LLaVA) that automatically extracted and structured 340+ learning concepts from raw lecture slide text and images into relational hierarchical directed acyclic graphs (DAGs).
- Reduced manual review time** for professors by developing an **automated screening pipeline** that checks exam questions against course materials, ensuring full test coverage.

Cyzone (创业邦) | Data Analyst Intern (Remote)

May 2025 – July 2025

- Validated and standardized **30+ venture capital datasets daily** across **20+ key cities**, ensuring data integrity for flagship reports.
- Synthesized emerging tech trends and startup valuations to deliver actionable market insights for Cyzone Media, reaching **22M+ entrepreneurs and investors**.

Attribute Data | Junior Analyst (Promoted from Data Intern)

Sept 2023 – May 2024

- Designed and deployed comprehensive **Adobe Analytics dashboards** to track campaign performance and customer behavior, directly supporting C-suite KPI reporting.
- Automated User Acceptance Testing (UAT) workflows using Excel, accelerating manual validation time by **50%**.
- Authored technical specs for web tagging pipelines and co-led data validation onboarding for **16+ stakeholders**.

PROJECTS & HACKATHONS

Doctor Everywhere - Telemedicine Platform [\[Github Link\]](#)

Vue.js, Python, Docker, Microservices, Firebase

- Architected a containerized telemedicine platform featuring virtual patient queuing and consultations, medicine dispensing and secure payment gateways to streamline end-to-end remote healthcare.

2Shiok2Go - Sustainability Web Application [\[Github Link\]](#)

Vue.js, Flask, Gemini AI, Google Maps API, Chart.js

- Developed a full-stack application integrating AI food recommendations and real-time ordering and pickup location mapping to dynamically connect consumers with surplus hawker food to reduce food waste in SG.

SMUBIA Datathon (Inter-University) [\[Github Link\]](#)

Ollama, Network Visuals, Web Development

- Developed a predictive web application for the Internal Security Department, integrating Ollama and network visuals to automatically summarize, visualize and prioritize urgent security cases.

LEADERSHIP

SMU Project Ippon IX (Overseas Community Service Initiative) | Main Leader

Dec 2025

- Spearheaded a 26-member team to the Philippines, managing overseas stakeholders and curriculum planning for interactive English, Math and First Aid lessons while fostering cross-cultural exchange.

CERTIFICATIONS

Microsoft Power BI Data Analyst Associate • AWS Cloud Practitioner • Google Tag Manager Fundamentals • Machine Learning using SAS Viya • Oracle Academy Database Design & Administration • Google Advanced Data Analytics Professional Certificate

SKILLS

Software Dev & Cloud: Python, SQL, JavaScript, Vue.js, Flask, REST APIs, Docker, Microservices, AWS, Google Cloud, Firebase.

Data Science & AI: PyTorch, TensorFlow, Scikit-learn, Pandas, NumPy, MLOps, GenAI (RAG, LLMs, Agentic Workflows / Multi-Agent Systems, Ollama, Gemma).

Analytics & UI/UX: Power BI, Tableau, Chart.js, Matplotlib, Figma, Git, Usability Testing, Data Manipulation Workflows, Adobe Analytics.
