PROFESSIONAL SUMMARY

Data-driven Information Systems sophomore specializing in Business Analytics. Experienced in transforming raw data into actionable business intelligence using **Power BI, SQL, and Adobe Analytics**. Skilled in creating dashboards to uncover insights immediately applicable to business strategy, optimizing data governance workflows, and conducting market research in venture capitals. Seeking a Business / Data Analyst internship between May – July 2026 to apply my analytics and storyboarding skills.

EDUCATION

Singapore Management University (SMU)

Sept 2024 – Present

Bachelor of Science (Information Systems) (Specialized in Business Analytics)

Nanyang Polytechnic (NYP)

Apr 2021 – May 2024

Diploma in Applied AI & Analytics (Specialized in Big Data Analytics)

WORK EXPERIENCE

Cyzone (创业邦)

May 2025 – July 2025

Data Analyst Intern (Remote)

- Validated and standardized **30+ venture capital datasets daily** across 20+ key cities, ensuring data integrity for flagship reports.
- Synthesized trends in emerging technology sectors and startup valuations, translating complex market data into actionable insights for Cyzone Media, influencing **22M+ entrepreneurs and investors**.

Attribute Data

Sept 2023 – May 2024

Junior Analyst (Feb 2024 – May 2024) • Data Intern (Sept 2023 – Feb 2024)

- Designed and deployed comprehensive **Adobe Analytics dashboards** to track campaign performance and customer behavior, directly supporting C-suite KPI reporting.
- Automated User Acceptance Testing (UAT) workflows using Excel, accelerating manual validation time by **50%**.
- Authored technical specifications and business requirement document for web tagging pipelines and co-led onboarding for **16+ stakeholders** on data validation protocols to ensure accuracy.

PROJECTS & HACKATHONS

ISD Entity Extraction & Visualization App (SMUBIA Datathon 2025, Inter-University)

- Led a 4-person team to develop a predictive web app (Python Flask, Ollama API) for ISD Singapore, **automating the extraction of entities and relationships** from unstructured text to **reduce manual data sifting**.
- Visualized complex case relationships** using Python network graphs and NLP summarization, accelerating decision-making.

SG Livability Analysis & Predictive Analytics (NYP)

- Defined Singapore liveability metrics and infrastructure gaps by benchmarking **100+ collected responses** against public data.
- Developed **predictive Power BI dashboards** (DAX, AI) to analyse public transport efficiency and forecast infrastructure load.

LEADERSHIP & AWARDS

SMU Project Ippon IX (Overseas Community Service Initiative)

Dec 2025

Main Leader

- Spearheaded a 26-member team to the Philippines, managing overseas stakeholders and curriculum planning for interactive English, Math and First Aid lessons while fostering cross-cultural exchange.

CERTIFICATIONS

Microsoft Power BI Data Analyst Associate • AWS Cloud Practitioner • Google Tag Manager Fundamentals • Cisco Networking Essentials • AI4I - Literacy in AI • ParseHub Web Scraping (Basics – Advanced) • Machine Learning using SAS Viya • Oracle Academy Database Design & Administration

SKILLS

Programming & Web: Python, SQL, JavaScript, HTML/CSS, Vue.js, Flask, REST APIs

Analytics & Visualization: Power BI, Tableau, Matplotlib, Seaborn, Chart.js

Data Science: NumPy, Pandas, SciPy, Scikit-learn, NLTK, PyTorch, TensorFlow

Cloud & Databases: AWS, Google Cloud, Firebase, Apache Spark, Cassandra

Design & Tools: Figma, Maze, Git, UI/UX Prototyping, Usability Testing, Microsoft Office

Professional: Adaptability, Leadership, Stakeholder Communication, Project Management
